One Day Workshop on
MPSC Prelim Examination: Syllabus and Time Management
REPORT (28.09.2018)

A one day workshop on 'MPSC Prelim Examination: Syllabus and Time Management' was organized on 28.09.2021 under the aegis of Social Science Association and Competitive Exam Cell. The purpose of this workshop was to orient students about the syllabus, time management and structure of question paper to the UG and PG students. There were two resource persons: Mr. Sunil Khollam, Nayab Tehsildar, Vaijapur and Dr. Dadasaheb Salunke, Coordinator, IQAC, Vinayakrao Patil Mahavidyalaya, Vaijapur.

The programme started at 11.00 am with an introduction by Mr. V. R. Parsode, Assistant Professor, Department of Political Science. He said that the State Prelims is an important examination, but many students have some misconceptions with regard to its syllabus and question paper structure. He welcomed both the resource person with a book.

Mr. Swapnil Khollam delivered a lecture on **MPSC Exam Syllabus**. He started his lecture with a few questions: do you know about MPSC? Do you want to be an officer? Have you seen the question paper? Do you think that you can serve the society better by becoming an officer?

This made the students interactive and they answered the questions differently. Mr. Swapnil had brought the recently conducted question paper. He shared that the main intent of the prelim is to eliminate the large number of candidates and to test his or her basic competencies. He pointed out that the main components in this exam are: History, Economics, Polity, General Science, Agriculture, Current affairs, Maths and General Intelligence etc. He asked the students to study the NCERT books thoroughly and read at least two newspapers carefully. He also provided a list of important books for their references.

The second session started at 12.30 pm. **Dr. Dadasaheb Salunke** talked about the **Time Management and Study Techniques**. He told the students that very often students do not revise all the components thoroughly. He added that the syllabi of Std. 8 – 10 is an important exercise because at least 70% questions are picked up from these textbooks. Many times, students try to solve the hard sums and waste time, instead you should skip such complex questions and then try to deal with those that they can answer easily. For getting update of agriculture component he suggested to read Sakal Agro One daily and to watch the famous evening programme 'Amchi Mati Amchi Manasa'. At the end of the programme, some students asked many interesting questions. Both the resource persons answered their queries. 67 students attended this workshop.
