**Lecture on 'Polythene Bags: Danger to Environment' by Dr. B. N. Jadhav
(29-12-2019)**

REPORT

Dr. B. N. Jadhav, Assistant Professor, Department of Zoology sensitized the students with the topic 'Polythene Bags: Danger to Environment' on 29-12-2019. Pooja Dadasaheb Tribhuwan welcomed the resource person.

He said that both in rural and urban areas, polythene bags have been used on a large scale and as a result it is a major waste in the overall litter system. Nowadays, we see that for packing purpose shopkeepers use polythene bags and its use has become so recurrent that in many restaurants food items are packed and handed over to the customers. Its impact on the human health is very often ignored.

Dr. Jadhav said that throughout the camp days volunteers clean the village streets and other public places and we find that polythene bags and wrappers are lying everywhere. Even if we collect them in bins, due to their light weight they fly away easily. So it is very challenging to collect them. The second concern is that it takes years together for a polythene bag to decompose. And when the decomposition happens, it releases harmful substances into the environment. Some people due to ignorance simply burn the heap of polythene bags, but that is also dangerous to the environment. It pollutes the air. Scientists say that the plastic contains cancer causing substances and so it is dangerous to human health.

Nowadays, at many places plastic litter is used as landfill. However, it keeps on emitting gases like methane and carbon dioxide and so the effects are felt over a longer period of time. Birds and animals mistake plastic for food stuff and consume it. So animals die due to choking and birds too perish as they are not able to digest it. Even in the marine ecosystem, the plastic waste kill the aquatic animals and birds. This is a major concern because most of the waste plastic is thrown in to the seas and oceans. Dr. B. N. Jadhav asked the students if they are able to manage life without plastic. They replied that it is absolutely possible to eliminate plastic from our life. The students also said that plastic production need to be cut down so as to encourage people to use other eco-friendly alternatives. They also viewed that Government should bring complete ban on use of plastic bags. At the end Shubhangi Ganpat Labde proposed the vote of thanks. Savita Shankar Jadhav conducted the proceeding.
