Lecture on 'Water Pollution in Vaijapur Tehsil' by Mr. Jayant Sonar (25-12-2018)

REPORT

Mr. Jayant Sonar, Assistant Professor, Department of Chemistry, Vinayakrao Patil Mahavidyalaya, Vaijapur shared the causes, consequences and remedies for water pollution in respect of water bodies in Vaijapur. Priti Sanjay Marathe, B. Com. III, welcomed and introduced the resource person.

He said that water is an important natural resource but when undesirable changes occur in its natural constituents, it gets polluted. Human interference is responsible for water pollution. Earlier, people believed that water pollution is an urban concern, however, now the water bodies in rural areas are also getting polluted.

Dr. Sonar said that industrial waste, sewage and waste water, disproportionate mining activity and use of fertilizers and pesticides are responsible for water pollution. As far as the water pollution in our tehsil is concerned, sewage, waste water, chemical fertilizers and pesticides are the major factors contributing to water pollution.

Dr. Sonar informed the students that the river Godavari flows through this tehsil and there are other important river like Dheku, Shivna, Narangi etc. Some fifty years ago people used to drink water from these rivers. But today the situation has changed dramatically. Now we cannot drink that water, because it is polluted.

Dr. Sonar cited the example of Godavari river that flows through the southern part of the tehsil. He added that many industries are located on the bank of this river. The industrial waste has been on the rise day by day. That's why the water has been polluted. The people living on the bank of this river complained that they could not use this water for agriculture in the months of December to June when the flow stops.

He also said that the overuse of chemical fertilizers has been responsible for polluting water bodies. Pesticides when sprayed percolates into the soil and even reach the groundwater. As a result the water becomes unfit for drinking. Similarly, when the aquatic animals consume this water it causes serious interference in the food chain. Traces of sulphur, chlorine, nitrogen, phosphorus, bromine and heavy metals like copper, arsenic, sulphates, lead and mercury have also been found in water bodies.

He said that in the recent years the use of herbicides has become a fashion. They are used to control weed. However, it causes damage to the water bodies. So while using them we have to follow the guidelines. He called upon the students to refrain from polluting water bodies and follow an eco-friendly lifestyle as much as possible. Komal Bharat Jagtap, B. A. I, proposed the vote of thanks. Sandeep Kachru Moin, B. Com. I, conducted the proceeding.

Dr. Babasaheb Ambedkar Marathwada University, Aurangabad
