'Health Counselling' by Mr. Vijay Patil (26-12-2018)

REPORT

A session dedicated to health counselling was conducted by Mr. Vijay Patil, Counsellor, Integrated Counselling and Testing Centre Counsellor, Sub-District Hospital, Vaijapur on 26-12-2018. Rani Ashok Raut, B. Com. II, welcomed and introduced the resource person.

Mr. Patil said that the students must have heard about HIV/AIDS on Television, but they might not know much about it. He said that prevention is better than cure. He explained that HIV destroys the important cells in human immune system. These cells are called as CD4 or T cells. These are important cells because they fight with infection. When their number declines, it goes difficult for our body to fight the infection. This leads to AIDS, unless treated. He identified the channels of transmission: blood, semen, vaginal fluid, anal fluid, breast milk. According to him having unprotected sex, having another sexually transmitted infection such as syphilis, herpes, chlamydia, gonorrhoea and bacterial vaginosis, sharing contaminated needles, syringes and other injecting equipment and drug solutions when injecting drugs;, receiving unsafe injections, blood transfusions and tissue transplantation, and medical procedures that involve unsterile cutting or piercing and experiencing accidental needle stick injuries may lead to HIV/AIDS infection

He suggested the different prevention strategies to the students in order to be safe from HIV/AIDS. He said that today sex education is required. But unfortunately, these topics are not incorporated in our curriculum adequately. He said that HIV test is important. Once you are tested, you can take measures to limit its spread. You can also start the treatment immediately. So we can even stop the progression of HIV. So in that case you should consult the ICTC. He said that HIV patients can lead a normal life if they follow the treatment properly. He also called upon the students that they should give up the misconceptions regarding HIV/AIDS and that we should accept them. HIV/AIDS does not spread from physical touch or social contact. He also explained the three stages of HIV/AIDS. With proper medical treatment and care, the patient can live their normal life span. Rushikesh Changdeo Dhande, B. Com. III, proposed the vote of thanks. Gokul Haribhau Kahalaskar, B. Com. III, conducted the proceeding. Total 165 volunteers were participated.

Dr. Babasaheb Ambedkar Marathwada University, Aurangabad
